Publishing and Sharing in Tableau

Assignment

PW SKILLS

1. What is the key difference between publishing a dashboard on Tableau Public versus Tableau Server/ Cloud in terms of accessibility and data security?

2. When publishing a Tableau dashboard, what happens to a live connection compared to an extract? How does this affect data refresh and performance?

3. In Tableau Server or Cloud (conceptually), which feature allows administrators to control which users can view, interact with, or edit a published dashboard?

4. If you want users to view a dashboard but not download the underlying data, which permission setting would you adjust in Tableau Server?

5. Name two methods by which a Tableau dashboard can be embedded into a web page or website.

6. List two best practices you should follow when preparing a dashboard for public sharing to ensure data security and privacy.

7. After publishing a dashboard, users report a "Data not found" error.
   What is the most common cause related to data source settings?

8. When embedding a Tableau dashboard into a secure internal portal, what two additional security measures should be implemented to ensure only authorized users can access the embedded content?
